

optomap® ultra-wide digital retinal imaging

- **The only exam that captures more than 80% of your retina in one image as compared to conventional devices.**
- **The ultra-wide view helps Drs. Cassidy & Dr. Tolomei detect early signs of retinal disease.**
- **In addition to eye conditions, other diseases such as diabetes, hypertension and stroke can also exhibit in the retina.**
- **The procedure is fast, easy and comfortable.**
- **Most patients can avoid having their eyes dilated.**

If you have any questions or concerns please ask us.

Insurance plans help cover basic vision exams, but do not include advanced procedures like the optomap®. The fee for this imaging is an additional \$39.00.
